Bike-Up Spin 12

With the help of Bike-Up Spin 12, the number of bikes is maximized on the smallest possible surface. The rack is well suited for lack of space and when the ceiling height is lower than what is recommended for bike racks on two levels. The rack is fixed to the floor with 8 bolts and requires only 3x3 meters in floor space and about 2 meters in ceiling height. Holds up to 12 bicycles and is advantageously placed in a corner.

Models

ARTICLES / DESCRIPTION	HEIGHT (MM)	SURFACE TREATMENT
 1000-12 Recommended floor space 3x3 m	2000	Hot dip galvanized
